The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson as further evidenced by Schwartzberg for reasons of record.

Applicant argues that Anderson is directed to browning foods but the browned food of Anderson would be expected to have a cooked appearance and thus be “fried-like”. It is not seen that “browning” in Anderson would be considered “slightly burned”, as urged by applicant. Applicant argues that the emulsifier in Anderson is for a different purpose than that set forth in the claims. The claims use an emulsifier to provide a contact angle. To the extent that the claims are definite, one of ordinary skill in the art would expect the emulsifiers in Anderson to provide this contact angle because it is present in the coating composition. The specification does not set forth any specific conditions which would prevent the emulsifier from providing the required contact angle. Applicant argues that there is no water in the claimed invention. This has been considered but the claims are not limited by the absence of water.

The rejection of the claims over Noriaki and Akiko has been dropped because the claims were cancelled.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
